Cell	
E3	To be considered for a SBYA BOTY award, a boat must compete in at least 50% of the regattas held. The number in this cell (colored yellow) represents 50% of regattas currently held (rounded down)
"Pt" column for each race	The "fraction of boats beaten" scoring method will be utilized. Each final regatta score will be 0.1 point plus the fraction of boats beaten. For example, if your final standing in a regatta is 4th overall in a 10 boat fleet, since you beat 6 of 10 boats, the fraction of boats beaten = $6/10 = .600$. Your total race score = $0.1 + 0.600 = 0.700$. A boat which is DNF is considered to have beaten 0 boats and is scored 0.1 for the race.
C3	The (red) number in this cell represents the current number of Throwouts. The "series score" for each boat will be the sum of her race scores excluding her worst N scores, where $N = 20\%$ (rounded up) of the races completed by that class. For example, if a class sails 14 races for the season, then each boat will have her worst 3 races (including races in which they were not entered) dropped (20% of $14 = 2.8$, which rounds up to 3). The qualified boat with the highest "series score" is the winner, and others are ranked accordingly. Most throwouts will be for races not entered (and which therefore have a zero score not displayed). Where a non-zero score is thrown out, it is indicated with a strikethrough.
